

# New VMware vCenter™ Management Products Available Now

Simplify administration and reduce operating costs of virtualized datacenters with the VMware vCenter family of management products. Virtualization management products from VMware elevate IT management to what matters most – service levels – and allow IT to respond to specific business needs more quickly. The new vCenter products now available ensure application performance, measure the cost of virtual machines, and simplify management of the internal cloud for dev/test.

## VMware vCenter™ AppSpeed

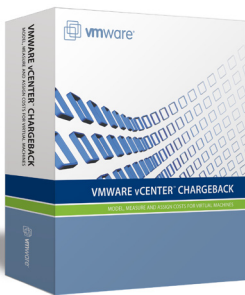

Manage the performance of virtualized, multi-tier applications

VMware vCenter AppSpeed enables VI administrators to ensure ideal performance levels for virtualized, multi-tier environments. AppSpeed is designed to measure the latency experienced by the application end users – and correlate that latency to the different tiers of the underlying physical and virtual infrastructure.

VMware vCenter AppSpeed for 1 processor

MSRP: \$1,250 USD | €1,020 EUR | £910 GBP

VMware Part #: VC-APSPD-C

## VMware vCenter™ Chargeback

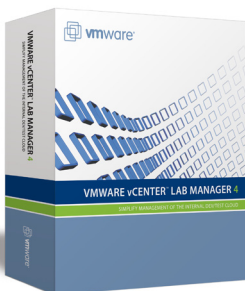

Model, measure and assign costs of virtual machines

VMware vCenter Chargeback enables accurate cost measurement, analysis and reporting that allows VI administrators to understand the costs associated with virtualized workloads – and to create cost transparency and accountability with business owners. Chargeback gives administrators the ability to build flexible cost models based on organizational units and existing structures within vCenter Server.

VMware vCenter Chargeback for 1 processor

MSRP: \$750 USD | €615 EUR | £545 GBP

VMware Part #: VC-CHBK-C

## VMware vCenter™ Lab Manager 4

Simplify management of the internal cloud for dev/test

VMware vCenter Lab Manager 4 provides on-demand access and automated management of the internal cloud for dev/test purposes. Application Owners, Development and QA, Support and Training teams can provision and manage their application environments through self-service portals under IT control. Lab Manager enables higher service levels, faster time to market, and simplified IT administration.

VMware vCenter Lab Manager 4 for 1 processor

MSRP: \$1,495 USD | €1,220 EUR | £1,085 GBP

VMware Part #: VC-VLM4-C
