VMware vSphere™ 4

VMware vSphere Enterprise Plus

The best platform for building cloud infrastructures

VMware vSphere Enterprise Plus has the full range of vSphere features including several differentiated enhancements such as: Distributed Switch, Host Profiles, 3rd party multipath, and 8-way vSMP. It transforms datacenters into dramatically simplified cloud computing environments for providing the next generation of flexible, reliable IT services. vSphere Enterprise Plus is ideal for more mature virtualization customers that are looking to transform internal IT into internal cloud infrastructure. Combining VMware's industry-leading virtualization technology and experience, it delivers uncompromising control, with greater efficiency, while preserving customer choice.

VMware vSphere 4 Enterprise Plus for 1 processor (maximum 12 cores per processor)

MSRP is USD \$3,495

VMware Part #: VS4-ENT-PL-C

VMware vSphere Enterprise

The strategic platform for automating resource management

VMware vSphere Enterprise provides key features for minimizing downtime, protecting data, and automating resource management. Combining VMware's market leading hypervisor with critical features like VMotion, Fault Tolerance, and Distributed Resource Scheduler (DRS), vSphere provides applications a safe and robust platform to improve availability and up time.

VMware vSphere 4 Enterprise for 1 processor (maximum 6 cores per processor)

MSRP is USD \$2,875

Expires 12/15/09

VMware Part #: VS4-ENT-C

VMware vSphere Advanced

The strategic consolidation solution that protects applications and data

VMware vSphere Advanced provides a strategic consolidation solution that protects critical business applications against planned and unplanned downtime to provide superior application availability and data protection. It combines the performance and reliability of the market-leading hypervisor with critical features for maintaining uptime of applications and backing up, restoring and securing business-critical data, v(Shield Zones) Data Recovery and Fault Tolerance. This solution is ideal for companies moving from basic consolidation to the early stages of virtualizing business critical applications.

VMware vSphere 4 Advanced for 1 processor (maximum 12 cores per processor)

MSRP is USD \$2,245

VMware Part #: VS4-ADV-C

VMware vSphere Standard

Cost-effective server consolidation

VMware vSphere Standard provides an entry solution for basic consolidation of applications to slash hardware costs while accelerating application deployment. It builds on the performance and reliability of the market-leading hypervisor to deliver a managed virtualization environment for test labs, preproduction servers, and remote offices. vSphere Standard is ideal for companies looking to benefit from hardware savings for their lower risk applications, either in test, preproduction, remote office, or low risk production environments.

VMware vSphere 4 Standard for 1 processor (maximum 6 cores per processor)

MSRP is USD \$795

VMware Part #: VS4-STD-C

VMware vSphere Essentials Plus

Cost-effective availability and data protection for small offices

VMware vSphere Essentials Plus provides an all-in-one solution for small offices to virtualize three physical servers and reduce hardware costs while ensuring high application availability and data protection. It delivers the performance and reliability of enterprise class solutions in a cost-effective package for small IT environments. This solution is ideal for small businesses and branch offices (<20 servers) and new companies just starting their adoption of virtualization.

VMware vSphere 4 Essentials Plus Bundle for 3 hosts (maximum 2 processors per host and 6 cores per processor)

MSRP is USD \$2,995

VMware Part #: VS4-ESSL-PL-BUN-C

VMware vSphere Essentials

Cost-effective server consolidation and management for small offices

VMware vSphere Essentials provides an all-in-one solution for small offices to virtualize three physical servers for consolidating and managing applications with a low up front investment, reducing hardware and operating costs. It delivers the performance and reliability of enterprise class solutions in a cost-effective package for small IT environments. vSphere Essentials is perfect for new companies just starting their adoption of virtualization or companies that are using ESXi and are looking to take the next step. In addition, it's a solution built for small businesses and branch offices (<20 servers).

VMware vSphere 4 Essentials Bundle for 3 hosts (maximum 2 processors per host and 6 cores per processor)

MSRP is USD \$879

VMware Part #: VS4-ESSL-BUN-C

Subscription only for VMware vSphere Essentials Bundle for 1 year

MSRP is USD \$116

VMware Part #: VS4-ESSL-SUB-C
