Now is the time to make the switch

Optimise the return on your Data Centre investments

If your HP Itanium or PA-RISC servers are approaching their end of service life, now is the time to trade up to Oracle's high-performance, integrated solutions. And for HP customers running Oracle software, there are even more reasons to make the change.

Only Oracle offers complete, open and fully integrated application-to-disk solutions that deliver world record performance and dramatically improve reliability, scalability and security. By running Oracle software on Oracle hardware, you do not just optimise performance; you can also reduce costs, boost operating efficiency and get maximum return from your technology investments. Make the switch and you can:

- **Protect investments and reduce risk** of your future IT deployments with OracleTs robust, public SPARC/Solaris roadmap and SPARC/Solaris binary compatibility guarantee
- **Improve performance and reliability** using SPARC servers running Solaris to deliver unrivalled scalability, world record performance, and mainframe class reliability at an affordable price. Oracle hardware and software are optimised to work together to significantly increase the performance of database applications
- **Reduce costs** by running Oracle software on Oracle hardware and taking advantage of OracleTs licencing costs on Oracle SPARC servers. OracleTs no-cost virtualisation capabilities also enable enterprise consolidation to help maximise IT value, reduce costs, and improve service
- **Increase security** with industry-leading data centre security of Oracle Solaris and the built-in encryption capabilities of the SPARC T3 processor

Powercube's alignment as a leading best of breed IT technology provider and integrator, establishes a tangible commercial and technical link between users and the vendor technologies. By forming strong, mutual partnerships with our clients foremost and proactively developing the vendor channel, we're experts at providing fit-for-purpose solutions and leveraging strong price and availability advantage for our clients.

Call or email our team at Powercube to find out what more we can do for you...
